

SUBJECT:
Compressor 9181137-01's
Overload 9181005-45

Number: 2022-07
Product: Compressor Overload
Date Issued: July 2022
From: Technical Services

Ice-O-Matic's supplier of the 918005-45 compressor overload (used in older versions of the 9181137-01 compressor) added an alternate manufacturer for the overload in 2019. This alternate manufacturer is now the only provider of the part, and it has a larger outer diameter that makes for a tighter fit into the mounting grommet on the compressor. While this may cause more difficulty during installation, it does fit. The current version of the 9181005-45 is the compressor manufacturer's preferred replacement.
