

**SUBJECT: THERMOSTATIC EXPANSION VALVE CHANGE
CIM1446 AIR, WATER AND REMOTE**

**Number: 2019-06
Product: CIM 1446
Date Issued: Oct 2019
From: Technical Services**

Continuing our efforts for Product improvement, a change has been implemented regarding the Thermostatic Expansion Valve on the CIM1446 Series ice machines to provide better production performance.

Units manufactured **from Serial Number 19101280011002**, will have the 9151152-01 Thermostatic Expansion Valves factory installed.

Any CIM1446 Air, Water or Remote in the field requiring a Thermostatic Expansion Valve should use the 9151152-101 as a replacement.

Units manufactured **prior to Serial Number 19102881102** in the field requiring a Thermostatic Expansion Valve replacement, will require both valves be replaced with the 9151152-101.

The CIM1446 Parts Manual will be updated to reflect this change.

Part Number 9151152-101 will include the Thermostatic Expansion Valve, insulation, wire ties to secure the insulation and the thermal bulb clamp.
