

**SUBJECT: ICE0606-ICE0605 REMOTE IMPROVEMENTS**

**Number: 12-21**  
**Product: Cuber**  
**Date Issued: July 2012**  
**From: Technical Service**

Several improvements are being made to the ICE0606-ICE0605 Remote Cooled Series cubers as part of our continuous improvement efforts.

1. The ICE0606 compressor has been changed to a more efficient model.
2. The purge cycle has been changed to purge on the high side of the cam. This improvement will allow for a more consistent purge to meet Energy Star requirements. (reference wiring diagram)
